We Treat You Right...

RAECO Rents is here to help you fulfill your most important objectives: **(1)** to get the instrumentation you need, when you need it, **(2)** to get instrumentation that works, and **(3)** to make sure you can use the instruments to their fullest capability. We want you to have a great experience working with *RAECO Rents!*

RAECO Rents Instant-On Guarantee

If our equipment doesn't arrive in working order, your rental is FREE for as many days as it takes us to get you a working unit. So, if we ship you a unit that doesn't work out of the box, and the replacement takes two days to arrive, you won't pay for those two days — and we'll add two free rental days to make up for any lost time.

Get your rental late? Let us know. If your rental equipment has been held up by bad weather, issues with the carrier, or other factors beyond your control, call us. We'll adjust the rental period to satisfy your requirements (and you won't be charged for the additional time.)

After-Hours Support

If you rent from us and need support between 5pm and 8am central time, call 866-736-8347 x1777, and mark your message urgent. Our on-call rental technician will call you back. Additional charges may apply.

Flexible Shipping Rates and Pre-Paid Return Shipping

Instead of requiring that all rentals ship overnight both to you and back, we'll do our best to keep shipping costs low. Unless the schedule demands an overnight shipment to get the rental instruments to you on time, we'll ship to you by a less costly UPS method, and ask you to return the instruments the same way.

RAECO Rents includes pre-paid return shipping labels with all instrument rentals. You just stick the label on the box and drop it off at any one of UPS's 40,000 drop points. Visit *UPS.com* to find the UPS location closest to you.

Discounts on Gently Used Instruments

Using an instrument more often than it'd make sense to rent? Short on the budget needed to buy a brand new unit? Are you in the market for gently-used instrumentation? Call us. RAECO Rents sells gently-used units out of our rental pool to help customers balance their demand and budgetary needs. See *bit.ly/RentsGU*

Free Return Shipping!

Every time you place an order with RAECO Rents, we'll pay the return shipping, and include a pre-paid return shipping label with every rental kit. It's built into our system, so there's no promo codes to remember or special form to fill out. And it's good every time you rent with us.

New RaecoRents.com website coming soon!

Do you have the time, expertise, or staff availability it takes to properly maintain your portable industrial hygiene and safety monitoring instruments? Are you sure they'll work when you need them to, or have all the accessories you need to perform your next test?

Before shipping instrumentation to you, a RAECO Rents technician calibrates the unit and runs diagnostics to make sure your rental kit is in proper working order.

Ventilation Testing and Balancing	10–11

Buy gently-used rental equipment at discount prices. Visit bit.ly/RentsGU or call 866-RENT-EHS (866-736-8347) for current pricing and availability.

Unlike Fine Wine, Rental Instruments Do NOT Get Better with Age

RAECO Rents Average Instrument Age = 2.5 Years

Have you ever opened a rental kit and found old, scratched, battered, and broken instruments inside? You won't have that experience with RAECO Rents.

When you rent, you expect that you'll get good quality instruments in proper working order, and not somebody else's cast-offs. To fulfill your expectation, we make sure the devices in our rental pool are not only clean, but in like-new condition.

What do we do with the old rentals? Let our upgrade cycle benefit you as well. When we're ready to replace a device in our rental pool, we'll sell it to you at discounted prices. Visit *bit.ly/RentsGU* for a list of gently-used rentals available for purchase.

RAECO Rents' Instant On Guarantee

If our equipment doesn't arrive in working order, your rental is FREE for as many days as it takes us to get you a working unit.

So, if we ship you a unit that doesn't work out of the box, and the replacement takes two days to arrive, you won't pay for those two days — and we'll tack on two additional free days to the end of your rental to make up for any lost time.

Respirator Fit Testers

PortaCount® Pro and Pro+ Respirator Fit Testers

Which model best fits your testing needs?

PortaCount Pro 8030

For disposable filtering facepieces Series 100, 99, P3, and HEPA masks, half and full-face masks, gas masks, PAPR, and SCBA mask fit testing.

D	W	M
$150.00 Daily	$450.00 Weekly	Call Us!

PortaCount Pro+ 8038

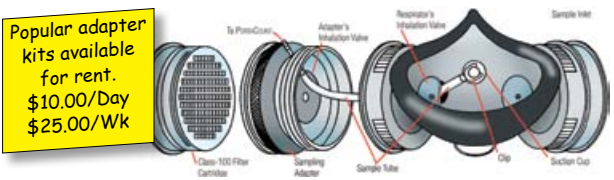
Fit test ANY tight-fitting respirator, plus N95, P2, and P1 disposables; OSHA-compliant for all respirators. Combines functions of TSI 8020 and 8095.

D	W	M
$200.00 Daily	$600.00 Weekly	Call Us!

TSI 8030 kit ships with *AC adapter, alcohol cartridge, alcohol fill capsule, storage cap, two zero check filters, alcohol supplies, 3/16" and 1/4" hose adapters, two spare alcohol wicks, carrying case, FitPro software and tutorial CDs, 1GB flash memory drive, USB cable, user manual, and calibration certificate.*

TSI 8038 kit ships with *AC adapter, alcohol cartridge, alcohol fill capsule, storage cap, two zero check filters, alcohol supplies, 3/16" and 1/4" hose adapters, two spare alcohol wicks, 25 sampling probes, probe insertion tool, neck strap, carrying case, FitPro software and tutorial CDs, 1GB flash memory drive, USB cable, user manual, and calibration certificate.*

Need a particle generator for testing in clean environments? Rent the TSI 8026, $25.00 per day, $80.00 per week.



Don't forget your respirator adapter kit!

Mask adapters are required for fit testing, but are ***not*** *included with any PortaCount rental units. If you don't have an adapter for your model respirator mask, see page 5. Kits generally include the adapter that connects your mask to the fit tester, P100 HEPA filters, and disposable components. If you need additional test supplies, buy the refill kit that matches your mask adapter kit. For-sale kits have enough supplies for 200 tests. For-rent kits have enough supplies for 25 tests.*

Free return shipping on every rental order!

Dust monitors reduce employee exposure risks

Area exposure monitors are ideal for characterizing airborne particulate concentration over time in a designated area. Personal exposure monitors perform the same function, but provide usable details about concentrations within the employee's breathing zone. Used together, they provide effective real-time data for making decisions regarding employee health and ventilation control.

Recently, we helped a customer with a large welding operation. There was visible smoke on the plant floor during operation, so they needed to address both potential hexavalent chrome and total respirable dust exposure. They decided to use the TSI DustTrak II for area monitoring, and employees started wearing AM510s for personal monitoring.

The TSI devices were used in tandem to characterize the environmental and breathing area particulate concentrations, and to evaluate several strategies to control ventilation and reduce exposure. With data from the DustTrak II and AM510s, the customer was able to select the most effective and energy efficient solution for reducing employee exposures.

Later, IH sampling confirmed dramatic reductions in both chrome and respirable dust exposure. Plus, employees reported being more comfortable in their environment.

SidePak™ AM510 Personal Aerosol Monitor

Intrinsically safe units!

TSI

AM510 Aerosol Monitor

D	W	M
$50.00 Daily	*$200.00 Weekly*	*Call Us!*

$210.00 Daily	$700.00 Weekly	Call Us!

- Weighs just 20.5 ounces! Easy to wear!
- Pressure and temperature calibrated, with datalogging feature
- Constant flow 25-5000 cc/min, constant pressure 1-5000 cc/min
- High-flow and low-flow constant pressure, constant flow — no adapters required
- Up to 40" H2O back pressure in high flow, up to 25" H2O in low flow
- Pump automatically performs restart to recover from temporary fault conditions
- Dock provides charging plus communication to PC or calibrator

Single kit includes *one sampling pump, single station communication/charging dock, USB cable, AC power supply, filter cassette holder, charcoal tube holder, pump management software, hex wrench, user manual, certificate of performance, and carrying case.*

5-Pack kit includes *five each: sampling pump, filter cassette holder, charcoal tube holder, certificate of performance plus one each: five-station communication/charging dock, AC power supply, hex wrench, pump management software, user manual, and carrying case.*

Gilian 5000 5-Liter Live Flow Air Sampling Pump

Need high back pressure? Gilian 5000 is the pump for you!

Gilian 5000

D	W	M
$25.00 Daily	$75.00 Weekly	Call Us!

Comes with *1000-5000 cc/min pump, low flow constant pressure adapter, NiMH battery, charger, filter cassette holder, US 120/240V power cord, 36" tubing, user manual, and carrying case.*

GilAir-5 5-Liter Constant Flow Sampling Pump

Kit includes *one 750-5000 cc/min pump, low flow (20-500 cc/min) module, 120 VAC charger, filter cassette holding kit, air boss kit, 35" tubing, screwdriver, tool kit, carrying case, and user manual.*

GilAir-5 Single Pump

D	W	M
$25.00 Daily	$75.00 Weekly	Call Us!

GilAir-5 5-Pack

D	W	M
$100.00 Daily	$350.00 Weekly	Call Us!

5-pack pump kit includes *five pumps and low flow modules, five-station charger, filter cassette holding kit, air boss kit, 35" tubing, screwdriver, tool kit, carrying case, and user manual.*

PhoCheck Tiger Photoionization Detector (PID) for VOCs

- Dynamic range ppb to 20,000 ppm for specific volatiles
- Accuracy to ±5% display reading ±1 digit
- LED, vibratory, and audible alarms — pre-programmed time-weighted average (TWA) and short-term exposure limits (STEL) for up to 450 different gases
- Logs >120,000 data points including date and time stamp, 33 hours at one log per minute
- Intrinsically safe ATEX, IECEx, and cUL approvals
- Battery life up to 30 hours, and can be changed in hazardous areas
- Capable of detecting Benzene without the need for specific tubes in areas of Benzene gas only; Requires selective pre-filter tubes for detecting Benzene in other compounds

Top 5 Reasons to Rent

1 Renting is Economical

When you rent, you bypass the costs of ownership: purchase, storage, depreciation, ongoing maintenance, annual calibration, insurance, and obsolescence. Renting provides a low-cost way of adding instruments for limited, one-time, or large scale projects.

2 Renting Gives You Reliability Assurance

When instruments sit on the shelf, sensors can decay and batteries go dead. So, when you're ready to use the instrument, you can't be sure it's up to spec, or that it will perform as you expect it to. Rental units come to you in kits, complete with all the necessary parts and consumables, so you'll know the instrument is ready to use when it arrives on your doorstep.

3 Renting Helps You Find Tools that Fit

If you're not sure that an instrument is right for your application, you can rent one on a daily or weekly basis, try it out, and find out first-hand if it will do what you need it to. If it does the job, and you're going to use it often, your financial outlay for the rental is easily justified, and you can purchase with confidence.

If the instrument isn't sufficient, you haven't made a major investment to find out. It's much easier than buying, figuring out through failure that the instrument isn't right for you, and going through the red tape (time, hassle, and restocking fees) of trying to return a used purchase.

4 Renting Makes Project Budgeting Easier

How do you determine the breakdown of instrument costs for a specific job? When you own instrumentation, it's easy to justify the cost of consumables, but it's hard to attribute a portion of the cost of a $10,000 instrument to that project.

Renting makes budgeting for projects straightforward. You can show your exact cost for the instrument and consumables that you use on a project. Carrying costs for the instrumentation don't get lumped into your overhead or your annual budget.

5 Rental Service Is Just That… Service

One of the most compelling reasons to rent instrumentation from RAECO Rents is the service that comes with it. Just as you've saved money on purchases, you'll also save on the cost of maintenance and support personnel. RAECO Rents factory-trained staff can recommend the right equipment for your application, and know how to use the instruments themselves.

We Want to Connect with You

Get the latest updates from RAECO Rents on your choice of social networks. Watch how-to videos, learn about new instruments, and get step-by-step instructions on how to use them.
